

SUMMARY

- Extensive web development working experience with hands-on designing, developing, and implementing applications skills.
- Detail-oriented developer, strong focus on clean and effective code, keen awareness of potential problems.
- Great passion for web development, eager to teach and learn. Good cooperation with team members.

WORKING EXPERIENCE

Web Developer

May 2022-present
Vancouver, Canada

Goopter (e-commerce)

- Maintain 4 applications, including the business admin system, business management desktop app, sales management web, and consumer web with React, Typescript, and Redux.
- Create new features including doordash delivery service, third-party delivery service setting, etc., and enhance existing data by using dynamic coding logic to make code clean and reusable.
- Develop website design based on the specific layouts, components, animations, and colors from mock-ups.
- Collaborate closely with UX designers, product managers, and backend developers to build user-friendly web experiences.
- Test existing features, diagnose bugs and discover corner cases to ensure the applications work well.
- Verify pull requests from other developers and gave feedback on any potential improvements.
- Work on agile development teams.

Junior Front-End Developer

Aug 2020-May 2021
Guangzhou, China

IFENG (Auto channel)

- Corporated with other team members in maintaining websites, including new features development, debugging, and code testing from the ticket system by using React and JavaScript.
- Created new features for the Year-end promotion campaign to collect target audiences' information.
- Developed 12 mobile web application's UI pages according to the UI designer's mock-up.
- Provide support to clients for instruction, technical issues, or feature requests.
- Test processes and test specs for projects.
- Building reusable code for future use.
